

**KERJASAMA INDONESIA – USAID MELALUI PROGRAM  
INDONESIA CLEAN ENERGY DEVELOPMENT (ICED) I  
PERIODE 2011-2015**

**BINA LEGAWATI**

**ABSTRAK**

Penelitian ini membahas mengenai Kerjasama Indonesia – USAID melalui Program Indonesia Clean Energy Development (ICED) I Periode 2011-2015. Program ICED merupakan Program bantuan teknis bilateral yang didanai oleh *United State Agency for International Development* (USAID). Program ini dimulai dari Maret 2011 sampai Februari 2015. ICED I dirancang untuk mendukung Pemerintah Indonesia mengembangkan sumber daya energi terbarukan berkelanjutan dan mengurangi emisi gas rumah kaca dari sumber energi fosil. Penelitian ini mengangkat pertanyaan penelitian, **“Bagaimana Kerjasama Indonesia-USAID melalui Program Indonesia Clean Energy Development (ICED) I periode 2011-2015?”** Untuk menjawab pertanyaan tersebut peneliti menggunakan enam Konsep yang terkait satu sama lain yaitu : Kerjasama Bilateral, Bantuan Luar Negeri, Energi Baru dan Terbarukan (EBT), Keamanan Energi, Indonesia Clean Energy Development (ICED), United State Agency for International Development (USAID). Metode dalam penelitian ini menggunakan metode Kualitatif Deskriptif yang menekankan eksplorasi dan klarifikasi mengenai suatu fenomena atau kenyataan sosial dengan cara mendeskripsikan sejumlah variabel yang berkenaan dengan masalah dan unit yang di teliti. Hasil Penelitian menunjukkan bahwa Kerjasama dalam program ini cukup membantu Indonesia dalam memanfaatkan energi baru terbarukannya sebagai sumber energi listrik.

**ABSTRACT**

This study discusses Indonesia-USAID Cooperation in Indonesia Clean Energy Development (ICED) I Program in 2011-2015. The ICED program is a bilateral technical assistance program funded by the United State Agency for International Development (USAID). The program starts from March 2011 to February 2015. ICED I is designed to support the Government of Indonesia developing sustainable renewable energy resources and reducing greenhouse gas emissions from fossil energy sources. This research raises the research question, "***How Indonesia-USAID Cooperation Through Indonesia Clean Energy Development Program (ICED) I in 2011-2015?***" To answer the question the researcher used six concepts that are related to each other that is Bilateral Cooperation, Foreign Assistance, Renewable Energy (EBT), Energy Security, Indonesia Clean Energy Development (ICED), United States Agency for International Development (USAID). The method in this research used Qualitative Descriptive method that emphasizes exploration and clarification about a phenomenon or social reality by describing a number of variables related to the problem and the unit in detail. The Results showed that cooperation in this program is enough to help Indonesia in utilizing new renewable energy as a source of electrical energy.

Keywords: Bilateral Cooperation, Foreign Aid, EBT, USAID, ICED I
