ABSTRACT

This study aims to determine the effect of corporate social responsibility, profitability, and capital structure on firm value with good corporate governance as a moderating variable. The population in this study are state-owned companies listed in the Ministry of SOEs for the period 2018-2020. The sampling technique used in this research is purposive sampling as many as 34 research samples. The data analysis technique used in this study uses Moderated Regression Analysis (MRA) with results showing that corporate social responsibility has a significant influence on firm value. Meanwhile, profitability and capital structure have no significant effect on firm value. Good corporate governance as proxied by institutional ownership is able to strengthen the relationship of corporate social responsibility and the ratio of debt to equity to firm value. However, institutional ownership is not able to strengthen the relationship of profitability to firm value.

Keywords: Corporate Social Responsibility, Profitability, Capital Structure, Good Corporate Governance, Firm Value.
