

EFEKTIVITAS KETERSEDIAAN HANDRUB TERHADAP KEPATUHAN PERAWAT DALAM HAND HYGIENE DI RUANG HARDJA IA RUMAH SAKIT BHAYANGKARA TINGKAT I RADEN SAID SUKANTO JAKARTA

Hemi Afifah

Abstrak

Kepatuhan perawat adalah suatu perilaku dan sikap seorang perawat dalam menaati standar dan aturan yang ada di ruang keperawatan. Perawat dalam melakukan tindakan keperawatan harus diawali dengan *hand hygiene*, dan hal ini harus dipatuhi karena merupakan tindakan pencegahan dan pengendalian infeksi. Tujuan penelitian ini mengetahui kepatuhan perawat dalam melakukan *hand hygiene* dengan menggunakan *handrub*. Jumlah responden sebanyak 10 perawat, dilaksanakan dengan menggunakan analisis deskriptif dengan metode observasi pada perawat saat *hand hygiene* dengan mempergunakan *handrub*. Hasil kepatuhan sebelum disediakan *handrub* sebesar 10%, dan setelah disediakan *handrub* pada setiap *bed* pasien sejumlah 80%. Disimpulkan adanya peningkatan kepatuhan perawat sebelum disediakan dan sesudah disediakan *handrub* di setiap *bed* pasien, dan adanya keluhan perawat mengenai keterbatasan *handrub* yang tersedia di ruangan. Rekomendasi agar hasil penelitian dijadikan salah satu *evidence based* untuk mengajukan anggaran mengenai ketersediaan *handrub* di ruangan.

Abstract

Nurse compliance is a nurse's behavior and attitude in obeying the standards and rules that exist in the nursing room. Nurses in carrying out nursing actions must begin with *hand hygiene*, and this must be adhered to because it is a preventive measure and infection control. The purpose of this study was to determine the compliance of nurses in carrying out *hand hygiene* using *handrubs*. The number of respondents was 10 nurses, carried out using descriptive analysis with the observation method on nurses during *hand hygiene* using *handrubs*. The result of compliance before *providing a handrub* of 10%, and after providing a *handrub* in each patient bed amounted to 80%. It was concluded that there was an increase in nurse compliance before it was provided and after *handrubs* were provided in each *patient's bed*, and there were nurse complaints about the limitations of *the handrubs* available in the room. Recommendations that the results of the study be used as *an evidence-based* to submit a budget regarding the availability of *handrubs* in the room.
