

HUBUNGAN ANTARA PENGETAHUAN, SIKAP DAN PENGARUH TEMAN SEBAYA TERHADAP PERILAKU MENYIMPANG KEARAH LGBT PADA ANGGOTA KARANG TARUNA X DAN Y DI KOTA DEPOK PERIODE JULI 2019

Inas Hanuniza

Abstrak

Estimasi populasi LGBT di Indonesia diperkirakan 4% dari total seluruh populasi penduduk Indonesia. Tahun 2014 banyak liputan kasus terkait LGBT di Kota Depok, seperti Orang Dengan HIV/AIDS di Kota Depok sebanyak 353 penderitanya adalah pelaku seks sesama jenis. Perilaku LGBT juga dapat menimbulkan masalah kesehatan lainnya, seperti penyakit menular seksual dan gangguan psikiatri. Determinan penting dalam membentuk perilaku seseorang adalah pengetahuan, sikap dan pengaruh teman sebaya. Penelitian potong lintang ini dilakukan bulan Juli 2019 pada 50 anggota Karang Taruna X dan Y. Partisipan diperoleh dengan teknik *total sampling*. Data yang diperoleh dianalisa menggunakan uji *chi-square*. Hasil uji menunjukkan adanya hubungan antara pengetahuan dengan perilaku kecenderungan LGBT ($P=0,010$; 95% CI: 0.182-0.781), sikap dengan perilaku menyimpang ($P=0,002$; 95% CI: 0.043-0.521), pengaruh teman sebaya dengan perilaku menyimpang ($P=0,011$; 95% CI 1.366-14.981). Kesimpulan yang didapat adalah terdapat hubungan antara pengetahuan, sikap dan pengaruh teman sebaya dengan perilaku menyimpang ke arah LGBT pada anggota karang taruna X dan Y di Kota Depok sehingga perlu dilakukan edukasi mengenai LGBT ke masyarakat di Depok.

Abstract

Population of LBGT in Indonesia estimated 4% of the total Indonesian population. In 2014, there were much cases related to LGBT in Depok City, such as People with HIV / AIDS in Depok City as many as 353 people involved in same sex relationship. Behavior of LGBT also leads other health problems, such as sexually transmitted diseases and psychiatric disorders. The determinations of LGBT behavioural tendency are knowledge, attitudes and peer group influence. A Cross-sectional study was conducted in July 2019 among 50 members of Local Youth Organization X and Y. Participants were obtained by total sampling technique. The data were analyzed using the chi-square test. Test results showed there were correlations between knowledge of LGBT behavior ($P = 0.010$; 95% CI: 0.182-0.781), attitudes of deviant behavior ($P = 0.002$; 95% CI: 0.043-0.521), and peers group influences ($P = 0.011$ 95% CI 1,366-14,981). The conclusion is there were correlations between knowledge, attitudes and peers' group influence with LGBT behavioural tendency in members of local youth organization X and Y in Depok City, so an education about LGBT in Depok is necessary.
