Jenis data dalam penelitian ini menggunakan data sekunder berbentuk waktu (*time series*) dan merupakan data tahunan periode 1991 – 2020, yang diolah menggunakan teknik analisis kuantitatif dengan metode Ordinary Least Square (OLS). Hasil dari analisis regresi linier berganda menunjukkan bahwa (1) terdapat tidak mempengaruhi antara Inflasi terhadap ekspor non migas (2) Kurs (nilai tukar) berpengaruh signifikan terhadap ekspor non migas (3) Penanaman Modal Asing tidak mempengaruhi signifikan namun sejalan terhadap ekspor non migas.

Abstract

This study aims to determine the effect of inflation, exchange rates, and foreign investment (PMA) on non-oil exports in Indonesia in 1991 - 2020. The type of data in this study uses secondary data in the form of time (time series) and is annual data for the period 1991 - 2020 , which was processed using quantitative analysis techniques with the Ordinary Least Square (OLS) method. The results of the multiple linear regression analysis show that (1) there is no influence between inflation and non-oil and gas exports (2) the exchange rate (exchange rate) has a significant effect on non-oil and gas exports (3) Foreign investment does not significantly affect but is in line with non-oil exports.
