***Abstract***

*This research aims to analyze the influence of supervision and leadership style on employee discipline, with motivation as a moderating variable. The research method uses a quantitative approach with data collection techniques via a Google Form questionnaire which is distributed to employees in the Secretariat Section. The data analysis technique was carried out using descriptive and inferential data analysis which was processed using SmartPLS 4.0. The sample for this research was 73 employees in the Secretariat Section of the Directorate General of Islamic Community Guidance, Ministry of Religion of the Republic of Indonesia, who were selected using the probability sampling method. The results of testing this research are that (1) supervision has a significant effect on employee discipline, (2) leadership style has a significant effect on employee discipline, (3) supervision has no significant effect on employee discipline which is moderated by motivation and (4) leadership style has no significant impact on employee discipline which is moderated by motivation. It is hoped that the practical implications of this research finding can contribute to improving human resource management, especially in increasing the effectiveness of supervision and leadership to encourage employee discipline.*
