

***The effect of Audit Committee Meeting Frequency, Client Importance, Audit Fee,
and Auditor Switching of Audit Quality***

By Ludofica Lastiar Batubara

Abstract

This research aims to examine the influence of audit committee meeting frequency, client importance, audit fees, and auditor switching on audit quality in State-Owned Enterprises (BUMN) for the 2019-2022 period. The sample collection method was carried out using a purposive sampling method so that a sample of 31 companies was obtained with a total sample of 111 secondary data originating from the annual reports of each entity. The analysis technique used to test the hypothesis uses a logistic regression analysis model with a significance level of 5% (0.05). Data was processed using STATA version 17 software and Microsoft Excel. The results of this research indicate that audit committee meeting frequency and auditor switching do not have a significant effect on audit quality, while client importance has a significant negative effect on audit quality and audit fees have a significant positive effect on audit quality.
