

The Effect of Thin Capitalization, Transfer Pricing, and Capital Intensity on Tax Avoidance

By Zahrina Amalia Rainisa

Abstract

This quantitative study aimed to analyze the influence of Thin Capitalization, Transfer Pricing, and Capital Intensity on Tax Avoidance. Transfer Pricing was measured using two proxies, and the measurement of Capital Intensity was modified. Secondary data were sourced from the financial statements and annual reports of mining companies listed on the Indonesia Stock Exchange (IDX) for the period 2020-2023. Using a purposive sampling technique and an unbalanced data panel, 131 financial statements were selected as samples and analyzed using multiple linear regression with STATA v.18. The results indicated that Thin Capitalization has a negative effect on Tax Avoidance. Transfer Pricing and Capital Intensity did not have a significant impact on Tax Avoidance.
