

***The Influence of Organizational Justice and Perceived Organizational Support
on Organizational Citizenship Behavior with Employee Engagement as a
Moderating Variable (Case Study at the Data and Information Center of the
Ministry of Defense of the Republic of Indonesia)***

By: Nabil Hibatul Wafi Luthfan Fayyadh

Abstract

This study aims to determine and prove the effect of Organizational Justice and Perceived Organizational Support on Organizational Citizenship Behavior with Employee Engagement as a moderating variable. This research uses quantitative methods with the number of samples studied as many as 134 employees at the Data and Information Center of the Ministry of Defense of the Republic of Indonesia. The data analysis technique used in this research is descriptive and inferential statistical analysis. Data processing in this study used the SmartPLS 4.0 application with the Partial Least Square (PLS) based Structural Equation Model (SEM) method. The results of this study indicate that (1) Organizational Justice has a positive and significant effect on Organizational Citizenship Behavior, (2) Perceived Organizational Support has a positive and significant effect on Organizational Citizenship Behavior, (3) Employee Engagement has a positive and significant effect in strengthening the relationship of Organizational Justice to Organizational Citizenship Behavior, and (4) Employee Engagement has a positive and significant effect in weakening the relationship of Perceived Organizational Support to Organizational Citizenship Behavior.
