

THE INFLUENCE OF OVERCONFIDENCE BIAS, HERDING BIAS, AND LOSS AVERSION BIAS ON STOCK INVESTMENT DECISION AMONG MILLENNIALS AND GENERATION Z

By Nadila Zahra Ariqinanty

Abstract

This study is a quantitative research that aims to evaluate the influence of overconfidence bias, herding bias, and loss aversion bias on stock investment decisions among Millennials and Generation Z. The respondents in this study were members of the “Group Belajar Saham+” investment community, with a total sample of 412 individuals determined using Slovin’s formula. The sampling technique used was non-probability sampling with a purposive sampling approach. Data analysis was conducted using the Partial Least Squares (PLS) method. The results of the analysis indicate that overconfidence bias has a positive and significant effect on stock investment decisions, herding bias also has a positive and significant influence, and loss aversion bias significantly and positively affects stock investment decisions among Millennials and Generation Z.

Keywords: *Overconfidence Bias, Herding Bias, Loss Aversion Bias, Stock Investment Decision, Millennials, Generation Z.*

PENGARUH *OVERCONFIDENCE BIAS*, *HERDING BIAS*, DAN *LOSS AVERSION BIAS* TERHADAP KEPUTUSAN INVESTASI SAHAM GENERASI MILENIAL DAN GENERASI Z
