

The Influence of Accounting Conservatism, Profitability and Growth Opportunity on Earning Response Coefficient

By

Eren Sistyningsih

Abstract

This research aimed to see whether there are influence of accounting conservatism, profitability and growth opportunity on earning response coefficient. This study uses the miscellaneous industry sector of manufacturing companies listed in Indonesian Stock Exchange for period 2015-2017 as population. Sample selected by using purposive sampling method and collected 39 companies from miscellaneous industry sector of manufacturing companies. Testing the hypothesis in this study was used Multiple Linear Regression Analysis using SPSS version 25 analysis tools with a significant level of 5% (0.05). The results of these tests indicate that: (1) accounting conservatism has no significant influence on earning response coefficient, (2) profitability has no significant influence on earning response coefficient, and (3) growth opportunity has a significant positive influence on earning response coefficient.

Keywords : accounting conservatism, profitability, growth opportunity, earning response coefficient.

Pengaruh Konservatisme Akuntansi, Profitabilitas dan *Growth Opportunity* Terhadap *Earning Response Coefficient*
