- 2015**

Miftha Loro Maisitha

Abstrak

Tulisan ini membahas mengenai Kerjasama Pertahanan Indonesia dengan Filipina dalam Memberantas *Piracy and Armed Robbery Against Ship* yang sering kali dihadapkan pada permasalahan kejahatan terutama penyanderaan dan pembajakan kapal. Indonesia dan Filipina telah melaksanakan patroli, intelegen dan pelatihan bersama di perairan sulu namun angka tindak kejahatan di wilayah tersebut masih tergolong tinggi. Pendekatan yang ingin dilihat dalam tulisan ini yaitu pembentukan kerja sama bilateral, dimana pemerintah perlu melakukan kerjasama pertahanan yang cukup mengikat. Indonesia selaku negara yang memiliki kepentingan teritorial cukup besar di wilayah tersebut harus menginisiasi tindak lanjut dari pertemuan-pertemuan yang telah dilaksanakan di antara kedua negara. Laut Sulu termasuk jalur pelayaran yang berbahaya.

Abstract

This paper discusses Indonesia's Defense Cooperation with the Philippines in Combating Piracy and Armed Robbery Against Ship which is often faced with crime problems especially hostage taking and ship hijacking. Indonesia and the Philippines have conducted patrols, intelligence and joint training in the waters of sulu but the crime rate in the region is still relatively high. The approach to be seen in this paper is the formation of bilateral cooperation, in which the government needs to do a fairly binding defense cooperation. Indonesia as a country with significant territorial interests in the region must initiate follow-up of meetings that have been held between the two countries. The Sulu Sea includes a dangerous cruise line.
